## The Chief Economist's Analysis [a focus on NEI CEDA]

*At the end of September 2018, the Ivorian publishing house NEI CEDA achieved a turnover of 6,493 million francs CFA, up by 34% compared to the same period in 2017. Its net profit amounted to 843 million francs CFA, up by 82% compared to the third quarter of 2017. The company justifies this dynamic by a good growth of the diffusion activity and the good performance of the markets with the State. The fourth quarter being, in general, a period of high activity due to the start of the school year, the company should finally record 2018 annual results sharply up compared to the 2017 financial year and certainly, the best over the last ten years. Indeed, the company achieved in 2017 an annual turnover of 6,008 million francs CFA and a net profit of 505 million francs CFA. On the stock market, the stock was speculated in 2018, contributing to the strengthening of its value. The stock finished the year 2018 with a capital gain of 359%. The confirmation of the annual results for 2018 and a possible distribution of dividends are likely to fuel a higher valuation of the stock over the medium term.*
