## The Chief Economist's Analysis [a focus on TOTAL SENEGAL]

At the end of the first half of 2020, TOTAL Senegal's revenues amounted to 197 billion FCFA compared to 216.7 billion FCFA for the same period of the previous year, a decrease of 9.1%. This decline in the company's activity is the result of lower sales due to the restrictions implemented for the fight against the covid-19 pandemic, in particular the curfew and the suspension of long-distance transport services. However, according to the company, the decline in revenues was mitigated by the 23% rebound in "Competitors, Export, and International Marine" sales. On the stock market, the TOTAL Senegal share price, shows an overall downward trend between the beginning of the year 2020 and November 13, 2020 (-25%) before appreciating thereafter and end the year in the green (+5.88% compared to the beginning of the year). The improvement in the share price stems from the company's decision to distribute a dividend amount similar to that of 2019 despite the effects of the health crisis on its business. In 2021, the share lost 25% of its value during the month of January. In the coming months, the outlook for the share price will depend on TOTAL Senegal's ability to maintain its activity in an economic environment still marked by the covid-19.
