## The Chief Economist's Analysis [a focus on BOA NIGER]

*BOA Niger's net banking income stood at CFAF 11,138.17 million at the end of the first half of 2019 compared to CFAF 10,477.06 million in the same period of the previous year, an increase of 6.3% which is justified by the bank by the 14.12% increase in the bank margin. The bank's net profit also increased over the period, from CFAF 4,338.20 million on June 30, 2018 to CFAF 4,530.44 million a year later, an increase of 4.43%. On the stock market, BOA Niger share recorded a capital loss of 13.21% at the end of 2019. This drop, which occurred from the second week of May, is linked to the publication the bank's first quarter results which revealed a 9% depreciation in its profits. The stock starts in 2020 at a price of CFAF 3,385 and ends the session of March 6 with a value of CFAF 3,500, an increase of 3.4% compared to the start of the year. The future development of the BOA Niger share price in the short term will be highly dependent on the performance of the bank at the end of 2019.*
