## The Chief Economist's Analysis [a focus on PALM CI]

PALMCI published on May 04 its performance for the 2019 financial year and for the first quarter of 2020. The results for the 2019 financial year showed improved results: turnover increased by 4% and a deficit lower than that recorded at the end of 2018. For the first quarter of 2020, PALM CI recorded a turnover of CFAF 40,949 million compared to CFAF 31,270.9 million in the same period in 2019, an increase of 30.9% which would come from the 33% rise in palm oil prices. In terms of net income, it more than doubled thanks to the 83% increase in profit from ordinary activities. On the stock market, PALM CI stock started 2020 at the price of CFAF 1,820 and then reached its highest level at the end of the session on February 3, 2020, at CFAF 2,450. This 34.6% increase could be explained by the anticipation of a positive development in company performance following the price increase in the second half of 2019. On May 8, 2020, the stock has been traded at CFAF 1,180, a depreciation of 35.2% compared to the start of the year. The PALMCI performance of the first quarter of 2020 will not be enough to reassure investors in a context marked by the health crisis and its implications on the prices of raw materials in general and those of palm oil prices.

### News BRVM Corporates

□ **[UNIWAX]:** UNIWAX SA presented its activity report for the first quarter of 2020. It appears that the turnover amounted to CFAF 8,572 million, a drop of 16% compared to the first quarter of 2019. Operating profit also contracted (-69%) to stand at CFAF 321 million. Net income fell 70% to CFAF 236 million compared to the same period in 2019.

□ **[UNILEVER CI]:** UNILEVER CI has published its activity report for the first quarter of 2020, which reveals a 17% drop in turnover compared to the first quarter of 2019. The net profit has improved at CFAF 61 million against a loss of CFAF 267 million in 2019.

□ **[SOCIÉTÉ GENERALE-CI]:** Société Générale Côte d'Ivoire published its financial results for the first quarter of 2020. Net banking income came to CFAF 39.8 billion, an increase of 21.4%. Net profit also increased (+ 41.4%) compared to March 31, 2019, standing at FCFA 14.1 billion.

### Market News

□ **[UEMOA]:** The latest BCEAO report on the conditions of banks in WAEMU indicates that the upward momentum of new loans and deposits is continuing, accompanied by a fall in the cost of credit in the WAEMU. Indeed, new credits amounted to CFAF 15,435.7 billion in 2019, an increase of 4.1% compared to the previous year; and new deposits increased by 4.3% to CFAF 7,469.6 billion. The lending rate fell throughout the zone except for Côte d'Ivoire and Niger, which observed an increase of 1% and 16.4% respectively.

□ **[MALI]:** The second cotton producer in Africa, Mali, dropped the producer price by CFAF 75 to CFAF 200 per kilogram for the first choice. This decision reflects the downward trend in cotton prices with the health crisis which constrains demand following the containment measures of half of the world population.

□ **[BURKINA FASO]:** The World Bank has granted \$ 21.2 million in funding to fight the COVID-19 pandemic in Burkina Faso. This funding is expected to strengthen the prevention, anticipation and response capacities of public health systems.
