### Market Trends

The BRVM ended this week down with 155.93 points for the BRVM 10 index (-0.70%) and 162.88 points for the BRVM Composite index (-0.62%). The capitalization of the equity market stood at 4 851 billion francs CFA. The equity market transactions amounted to 796 million francs CFA at the end of the week, mainly driven by « Public Services » (60%) and « Finances » (21%) sectors. SAPH CI stock recorded the largest growth this week with a gain of 10.87%, while ONATEL BF stock showed the largest decline with a lost of 11.83%. On the commodities market, the drop in crude oil prices persists (-9.54% in one week), while the price of coffee increased significantly this week (+12.76%).

## The Chief Economist's Analysis [a focus on PALM CI]

At the end of the first quarter of 2019, PALM CI's turnover amounted to 31.3 billion CFA francs, a decrease of 9% compared to the level recorded in the same period last year. This decline in turnover is mainly due to the 8% decrease in sales prices according to the company. As for the net profit, it recorded a very strong increase, from 1.2 billion CFA francs at the end of March 2018 to 2.8 billion CFA francs at March 31, 2019, thanks to the decrease of the factory charges over the period. The increase in production volumes expected by PALM CI, combined with the increase in the international price of palm oil projected by Reuters for 2019, should positively affect the performance of the company over the rest of the year. On the stock market, the downward in the PALM CI share price, which began in 2018, continues. Thus, at the close of the session of May 31, 2019, the share price stands at 1 245 CFA francs, against 1 900 francs CFA at the beginning of the year, a depreciation of 34.47%. This depreciation reflects investors' fear of the impact of the downward trend in palm oil prices on the company's results. For the next quarter of 2019, the share price could (slightly) improve with positive prospects for PALM CI's activities.

### News BRVM Corporates

□ **[ONATEL BF]:** The Burkinabe telecom company ONATEL has published its results for the first quarter of 2019. The turnover is down by 5.6% compared to the first quarter of 2018, to reach 39 218 million CFA francs, despite a traffic increase of 8.5%. The company justifies this evolution by the impact of free roaming and the profusion of offers not compensated by the increase in the use invoiced to customers. The net result amounted to 7,991 million CFA francs, down by 18.7% due to both the lower revenues and the high royalties for number blocks recorded during the quarter.

□ **[NSIA BANQUE CI]:** In the first quarter of 2019, NSIA Banque CI recorded growth in loans granted to its clients of 25% compared to the first quarter of 2018, while deposits grew by only 3%. Net banking income amounted to 15,877 million CFA francs, down by 9% compared to the same period in 2018. Nevertheless, NSIA Banque CI managed to achieve an increase in its net result (+ 37% compared to the end of March 2018) which stood at 2,817 million CFA francs. According to the bank, this significant increase is mainly due to the lower cost of risk. NSIA Banque CI plans to improve its performance for the rest of 2019.

### Market News

□ **[NIGERIA]:** The Nigerian Government has announced that it will grant tax incentives to investors willing to fund the construction of major road projects across the country. Thus, through the Road Infrastructure Tax Credit Scheme, any private company that builds a road with its own resources can recover the investment made through a tax credit equivalent to the amount invested. The Government is also considering automating the process of obtaining waivers of taxes or tariffs to make it more transparent and efficient.

□ **[BURKINA FASO]:** According to a statement from the IMF, the security and social situation remains challenging, with security incidents increasing and continued public sector pay disputes. The authorities are taking measures to address these challenges by providing increased resources to security and developing their medium-term public sector pay strategy. Notwithstanding this difficult backdrop, economic growth reached 6.8% in 2018, as the agriculture sector rebounded strongly, and other sectors remained resilient. Inflation reached 2% on average. The fiscal deficit also narrowed to 4.9% of GDP, essentially reflecting a decrease in public investment spending. Economic growth is projected to reach 6% in 2019, as agricultural growth reverses to normal. Inflation is expected below the Community standard of 3%. However, this outlook is subject to security and social unrest pressures subsiding.
