The Chief Economist's Analysis [a focus on SAPH CI]

For the first quarter of 2019, SAPH CI achieved a turnover of 32,801 million CFA francs, up by 14%, compared to the same period in 2018. The company justifies this rise by increase in the volume of its sales because, over the period, the average price per kilogram of rubber contracted by 5%. Net result stood at 110 million CFA francs at the end of the first quarter of 2019, compared to 648 million CFA francs at the end of March 2018, a decrease of 83%. No explanation was given by the company for this fall. On the stock market, in 2019, the SAPH CI share price fluctuated between 3,210 CFA francs and 3,840 CFA francs in the first three and a half months of the year, precisely until April 15, the date of publication of the annual results 2018. Subsequently, the share depreciated sharply as the results published showed a decrease in turnover and a negative net profit. The publication of the results of the first quarter of 2019, two weeks later, did not favor the rebound of the share price. On 12 July 2019, the share price was 2,000 CFA francs, down by 45.8% from the beginning of the year. In terms of outlook, the evolution of the share price of SAPH CI on the market will depend on the performance of the company, which itself largely depends on the price of rubber in the international market, where uncertainty remains.

News BRVM Corporates

- **[BOA BN]:** The Benin subsidiary of the banking group Bank Of Africa presented its performance at the end of the first quarter of 2019. Net Banking Income stood at 9,144 million CFA francs at the end of March 2019, down by 8% compared to the end of March 2018, due to the contraction in employment and commission income. However, net result improved by 3% over the same period to 3,030 million CFA francs, thanks to the control of operating expenses and the cost of risk.
- **[NSIA BANQUE CI]:** On 23 July 2019, NSIA Banque CI will pay its annual dividend for the 2018 financial year for a total net amount of 900 138 945 francs CFA, a net dividend per share of 194.2 francs CFA.

Market News

- **[AFRICA]:** The President of the African Export and Import Bank (Afreximbank) has announced a series of initiatives to support the implementation of the Agreement for the African Continental Free Trade Area. The first concerns the establishment of a \$1-billion AfCFTA Adjustment Facility to enable countries adjust in an orderly manner to sudden significant tariff revenue losses as a result of the implementation of the agreement. The second measure relates to the launch of the Pan-African Payment and Settlement System, the first continent-wide payment digital system focused on facilitating payments for goods and services in intra-African trade in African currencies. This platform is expected to save more than \$ 5 billion in transaction costs per year for the continent.

- **[COTE D'IVOIRE]:** The Ivorian economy has remained buoyant, posting one of the fastest growth rates in Africa. This rate is projected to reach 7.2 % in 2019, compared to 7.4% last year. This was the finding of the ninth economic update for Côte d'Ivoire published by the World Bank. This sound performance is due primarily to regained private sector momentum. However, the current dynamism is mainly concentrated in telecommunications, agribusiness and construction sectors. On the fiscal side, the government has reduced its deficit from 4.5 to 4% of GDP between 2017 and 2018, thanks to the tightening of spending (-0.9% of GDP) because the mobilization of revenue and grants has decreased (-0.5% of GDP). The outlook for the economy remains positive, with a growth around 7% over the next four years.
