## The Chief Economist's Analysis **[a focus on SMB CI]**

*At the end of the first quarter of 2020, the turnover of Societe Multinationale de Bitumes (SMB) amounted to CFAF 31,499.3 million compared to CFAF 11,156.2 million in the same period of the previous year (+ 182%). The company justifies this improvement by the reliability and availability of the units which allowed continuous processing and regular production. As for the net profit, it became positive, going from CFAF -1,425.9 million on March 31, 2019 to CFAF 1,729.4 million on March 31, 2020, in connection with the exponential increase in the result of ordinary activities (+ 265%). The SMB' stock started 2020 at a price of CFAF 2,500, then appreciated to reach its highest level on January 29, i.e. CFAF 3,695 (+ 47.8% compared to the start of year). The following day, the share price displayed a generally downward trend and stood at CFAF 2,550 at the end of the session on July 17, 2020 (+ 2% compared to the start of the year). For the second half of the year, SMB's performance could be weakened by the health crisis which is raging in a difficult context for the oil industry. The publication of the results for this period will assess the resilience of the company that has activated a continuity plan.*
