**Market Trends**

The BRVM ended this week up, with 152.45 points for the BRVM 10 index (+0.75%) and 157.17 points for the BRVM Composite index (+0.43%). The capitalization of the equity market stood at 4 679 billion francs CFA. The equity market transactions amounted to 2.968 billion francs CFA at the end of the week, mainly driven by « Public Services » (66%) and « Finances » (29%) sectors. NEI-CEDA CI stock recorded the largest growth this week with a gain of 12.24%, while CROWN SIEM CI stock showed the largest decline with a lost of 10%. On the commodities market, cocoa price ended the week down, in both New York (-4.54%) and London (-4.61%), while gold price strengthened (+3.81%).

The Chief Economist's Analysis [a focus on SOLIBRA CI]

SOLIBRA's turnover and other revenues amounted to 202.8 billion Francs CFA at the end of 2018. It is up (+4.8%) compared to its level recorded the previous year 193.4 billion of Francs CFA. The increase in sales resulted from an increase in the company's sales volumes, following the decrease in the price of one of its main products (Bock). As for the company's net result, it fell annually by 69.3%, standing at 1.3 billion Francs CFA 2018. This situation is mainly attributable to the increase in amortization (+13.3%) and financial expenses of the company (+90%) resulting from the loan obtained in 2017. On the stock market, in 2019, the evolution of SOLIBRA share price is broadly bearish. Indeed, the share price started the year 2019 at 56,000 Francs CFA and stood at 35,000 Francs CFA on August 8th, a regression of 37.5%. This downward trend can be justified by the decline in the company's net result and by the announcement of the distribution of a lower net dividend per share compared to that of the previous year (1,368 Francs CFA against 2,322 Francs CFA). SOLIBRA has been facing fierce competition in recent years, and the investments made to maintain its dominant position in the market are currently eroding its profits.

News BRVM Corporates

□ [ECOBANK CI]: The Ivorian subsidiary of the banking group Ecobank published its results for the first half of 2019. Net Banking Income was down by 3%, compared to the first half of 2018, to 40,239 million FCFA. In contrast, the bank managed to achieve a net profit up (+9%), thanks to a sharp drop in income tax (-58.9%). It should be noted a slight increase in gross loans to customers (+1%), against a decline in customer deposits (-16.7%) that the bank justifies by the execution of major structuring projects whose funds were housed in his books.

□ [BOA CI]: The rating agency Bloomfield Investment has re-evaluated the financial rating of Bank Of Africa Cote d'Ivoire (BOA CI). The bank has maintained its ratings, both for the short-term "A2" and the long-term "A" with a stable outlook. The rating is based on the following positive factors: a good evolution of commissions result; an improvement in the cost of risk; a decline in the concentration of the portfolio; compliance with the new prudential rules. Whereas, the main factors of fragility of the rating are: a capacity of the new management to reach its strategic objectives to be demonstrated; a decrease in market shares; underperformance in terms of resource collection and lending; a contraction in the interest margin; an increase in the cost / income ratio; a fragile political and security situation.

Market News

□[AFRICA]: The African Development Bank (AfDB) signed a \$4.8 million institutional support grant to the African Union for implementation of the African Continental Free Trade Area (AfCFTA). The grant forms part of a series of interventions by the AfDB in its lead role to accelerate implementation of the Free Trade Agreement, seen as a major force for integrating the 55-nation continent and transforming its economy. Currently, 54 states have signed the Free Trade Agreement and are about to start formal negotiations before its effective implementation in July 2020. The Niamey Summit announced the siting of the AfCFTA secretariat in Accra, Ghana.

□[COFFEE]: According to the International Coffee Organization, world coffee production is expected at around 10.065 million tons for the coffee season 2018/2019, up by 1.5% from the previous season. It would be supported by South American and African productions, growing by 4.4% and by 1.5% respectively, while production in the other areas would be down. Regarding global consumption, it is projected at 9.878 million tons, up by 2% compared to the 2017/2018 season. However, although the increase in imports during the first six months of the 2018/2019 coffee season is indicative of continued demand growth, demand has not kept pace with world production in the last two years. This would result in a global surplus of 186 660 tons of coffee for this season, after a surplus of 230 160 tons for the 2017/2018 season.
