## The Chief Economist's Analysis [a focus on SOCIETE GENERALE CI]

The SGCI ended the first quarter of 2020 with a Net Banking Income of CFAF 39,884 million, up 21.4% compared to the level of CFAF 32,866 million recorded in the same period of the previous year. This performance is due to the increase in the interest margin (+ 32%) and commission income (+ 8%) over the period. The growth in Net Banking Income, coupled with the control of overheads and the net cost of risk, led to an increase in the bank's profits. Indeed, the net profit rose from CFAF 9,997 million on March 31, 2019 to CFAF 14,134 million this year, an increase of 41.4%. On the stock market, the share price skyrockets from the start of 2020 to stand at CFAF 8,700 on March 12, an increase of 13% compared to January 2. The share price gradually drops thereafter, then rises slightly before reaching CFAF 6,800 at the close of the session on September 4, 2019, a decline of 12% compared to the beginning of the year. This overall downward trend incorporates the potential impact by investors of the health crisis on banking activities. The effective execution of the bank's strategic plan should mitigate this impact. However, its performance will experience a slowdown in their growth.

### Market News

□ **[ECCAS]:** After the reforms carried out within the Economic Community of Central African States (ECCAS), the general secretariat was dissolved in favor of the ECCAS Commission. This commission will be chaired by the Angolan Gilberto Da Piedade Verissimo. The priorities set by the commission relate to the resolution of crises in the Central African Republic and the Democratic Republic of the Congo (DRC), the threat of Boko Haram in Chad and Cameroon. The issue of sub-regional integration will also be at the heart of the commissions' mandate through the visa issue.

□ **[WAEMU]:** According to the report on foreign trade for the year 2019 of the WAEMU, The balance of goods and services of the Union stood at -5.0% of GDP in 2019 against -6.5% in 2018, thanks to a greater increase in exports of goods and services (+ 9.3%) compared to imports (+ 3.2%), in a context of good price performance in the gold (+ 15.9%), the Union's leading export product. The analysis of the export diversification indicator does not show any improvement for the Union in 2019, i.e. a weakly diversified structure.
