The Chief Economist's Analysis [a focus on SICOR]

In connection with the resumption of production in the "Grands Ponts" region (Jacqueville, Grand-Lahou and Gliké) in 2016, SICOR's turnover stood at 1.936 billion FCFA at the end of 2016, with annual growth of 125%. The result from its ordinary activities, supported by a 10% increase in operating income and a financial surplus of 16 million FCFA (against a deficit of 35 million in 2015), showed an increase of 49.5% to 210,5 billion FCFA. However, following a significant decline in the result from non ordinary activities (-298.9 million FCFA), net result contracted by 54% to 200.8 million FCFA in 2016. On the stock market, the announcement of the company's resumption of business in the "Grands Ponts" region enabled SICOR stock to earn 155% of its value between November 03 and December 22, 2016. In 2017, the stock is following the market downward trend. It lost 67.5% of its value in the first half of 2017. However, it shown a recovery between the beginning of July and the beginning of October 2017 and amounted to 6,000 FCFA on 6 October 2017, a decrease of 46% compared to the beginning of this year. With a strong potential (the main actor on the coconut market in West Africa) and with investments of 6 billion FCFA for the revival of its plantations and factories, SICOR is expected to increase its activities for financial year 2017 and the medium term. However, some operating difficulties encountered during the year due to theft of raw materials could mitigate these prospects.
