□ The BRVM closes this week down with 240.75 points for the BRVM 10 index (-1.19%) and 270.84 points for the BRVM Composite index (-1.28%). The market capitalization amounted to 6 697 billion FCFA. The transaction value of equity market amounted to 5.1 billion FCFA this week, spread mainly across the following sectors: "Finances" (48%) and "Public Services" (18%). The AIR LIQUIDE CI stock records the largest growth this week with a gain of 8.5% whereas the CFAO CI stock shows the largest decline with a fall of 14.99%. On the commodities market, crude oil maintains its upward trend, gold and silver show a recovery.

The Chief Economist's Analysis [A Focus on VIVO ENERGY]

Ivorian subsidiary of the fuel distribution company, Vivo Energy, conducted in the first half of 2016 a turnover of 130 183 million FCFA against 137 647 million FCFA for the same period in 2015, a decrease of 5%. This contraction in turnover came despite an increase in sales volume of 24 000 M³ / TM (due, in part, to extension of its network). The company explained this by the decrease in fuel prices at the pump, it was 648 FCFA at the end of the first half in 2015 against 573 FCFA on the same date in 2016. However, the company improved its gross margin on transport as well as on accessory products and other products by 11% and 15% respectively. Thus, net income stood at 2 308 million FCFA, up by 10%. On the stock market, the share value Vivo Energy follows an upward trend : +123.42% between 05 January and 21 October 2016. This performance is by far the best in the retail sector. In November 2016, there will be a splitting of the stock as decided by the General Meeting on June 23. This should enable better marketability of the stock Vivo Energy whose PER is the highest in the sector (59.8) and ensure best acquisition conditions for small savers. The gradual rise in oil prices could positively affect the future operating performance of Vivo Energy and enhance its attractiveness in the stock market.
