### Market Trends

The BRVM ended this week down with 208.19 points for the BRVM 10 index (-0.64%) and 229.83 points for the BRVM Composite index (-1.13%). The capitalization of the equity market stood at 6 203 billion FCFA. The equity market transactions amounted to 1.95 billion FCFA at the end of the week, mainly driven by « PUBLIC SERVICES » (55%), « FINANCES » (19%) and « AGRICULTURE » (17%) sectors. VIVO ENERGY CI stock recorded the largest growth this week with a gain of 8.77%, while NESTLE CI stock shown the largest decline with a lost of 10.60%. On the commodities market, oil price ended for the second week in a row above 50 USD the barrel, while natural gas and rubber prices ended the week down.

## The Chief Economist's Analysis [a focus on NEI CEDA]

In the first half of 2017, the Ivorian publisher NEI CEDA achieved a particularly remarkable performance as its seasonal activity is more dynamic in the second half of the year. Thus, the turnover of the company came to 2 174 million FCFA against 92 million FCFA in the first half of 2016, thanks to a contract obtained with the Ivorian government. According to the company, this performance, coupled with a healthy balance sheet and cost savings, had a significant impact on net result. It shown a deficit of 89 million FCFA at the end of June 2017 ; a smaller deficit than that recorded in June 2016 (1 234 million FCFA). On the stock market, NEI CEDA stock follows a downward trend: on 27 October 2017, its price stands at 47 FCFA, representing a decrease of 60.83% compared to its level at the beginning of this year. The attractiveness of the stock is very limited in the market due to no dividend payments over the past five years and quite mixed economic performance. The company expects good sales momentum for the second half, its main season. This forecast should be confirmed and allow NEI CEDA to end the year with a turnover up after two years of decline. This dynamic, in addition to measures to reduce charges, would contribute to improving the net result which could however remain in deficit.

### News BRVM Corporates

❑ **[SGBCI]:** The Ivorian subsidiary of Société Générale banking group has published its results for the first half of 2017. It appears that the bank has achieved a net banking income of 55.707 billion FCFA, up by 19% compared to the first half of 2016. Despite an increase in overhead costs of 10%, operating income shows an increase of 29% compared to end of June 2016. The net result stands at 23.488 billion FCFA at the end of June 2017, up by 27% compared to the same period last year.

❑ **[SODECI]:** The Water Distribution Company in Côte d'Ivoire recorded a decrease in volumes of water sold for the first half of the year 2017, which led to a slight drop in sales (-0.56%) compared to the same period in 2016. Higher contracting expenses and amortization expense impacted operating income, which contracted by 19.65% over the same period. Net result stood at 955.692 million FCFA against 968.712 million FCFA in the first half of 2016.

❑ **[ECOBANK]:** In a statement, Ecobank Transnational Incorporated announced the successful mobilization of 400 million USD by placing convertible bonds. The convertible bond, repayable in 2022, will carry an interest rate of 6.46% per annum, payable twice a year in arrears. This bond, which is convertible into ETI common shares, will be repaid at 110% of the principal if the conversion option is not exercised.

### Market News

❑ **[SOUTH AFRICA]:** Due to a series of negative factors, South Africa's economic growth projections for 2017 have been revised downward, from 1.3% to 0.7%, reported the South African Minister of Finance. The weakening of growth prospects reflects a deterioration in economic activity and a decline in household confidence since 2014. The budget deficit is expected to average 4.3% of GDP over the 2017-2018 period, compared with a fiscal target of 3.1% of GDP in 2017. Economic growth should then slowly recover, reaching 1.1% in 2018, then 1.5% in 2019 and 1.9% in 2020, thanks to an improvement of the global economic outlook.

❑ **[KENYA]:** Kenya Bankers Association (KBA) is calling for the removal of interest rate capping, a year after it was passed into law. According KBA Chief Executive Officer, the law, which was expected to provide low-cost credit and ultimately increase credit uptake has done the opposite as it has instead affected credit growth and discouraged financial inclusion. At the same time, the law has encouraged the development of short-term credit, the preference for government securities and a slowdown in investment loans. In June 2017, for instance, while about 3.2 million loan applications were made, only about 1.1 million of loans were disbursed, a 34 per cent success rate.
