## Market Trends

The BRVM ended this week down, with 207.33 points for the BRVM 10 index (-0.58%) and 224.46 points for the BRVM Composite index (-0.71%). The capitalization of the equity market stood at 6 058 billion FCFA. The equity market transactions amounted to 2,47 billion FCFA at the end of the week, mainly driven by « PUBLIC SERVICES » (57%) and « FINANCES » (27%) sectors. BOA NG stock recorded the largest growth this week with a gain of 12.5%. while PALM CI stock shown the largest decline with a lost of 13.48%. On the commodities market, cocoa and rubber prices ended the week down; in contrast, gold and silver prices ended the week up.

## The Chief Economist's Analysis [a focus SUCRIVOIRE]

After the first two trading days, when it gained 9%, Sucrivoire stock price follows a general downward trend since 02 January 2017. On 17 November 2017, the stock has lost 76.7% of its value compared to the beginning of 2017, with a price of 3500 FCFA at closing. This decline, which is in line with the bearish context of the market, also highlights the low attractiveness of the stock, despite the fact that its PER is the lowest in the "Agriculture" sector for more than 6 months (the PER of the title is 4.02 on 17 November 2017). This situation could be explained by the failure to achieve the objectives set by the company in 2016: a turnover of 52.8 billion FCFA against more than 54 billion CFA expected and a net result of 4.3 billion FCFA against more than 6 billion CFA expected. At the end of the first quarter of 2017, the company achieved a 1% decrease in its turnover compared to the first quarter of 2016. This situation is explained by the lower sugar content of canes, despite the fact that cane tonnage harvested was more important. In the same vein, operating income and net results decreased by 15% and 17% respectively. The company remains optimistic about its results for the first half of 2017. However, the improvement of the results for the whole of the 2017 financial year promises to be difficult because of the impact of climate change on production. Pending the publication of the forthcoming results, Sucrivoire stock price should not fluctuate significantly on the short-term and could stabilize at its current level.

### News BRVM Corporates

□ **[ECOBANK CI]:** The BRVM announced the first listing of the Ivorian subsidiary of the pan-African group Ecobank, admitted to the first compartment of the stock market, from Tuesday, December 12, 2017. Ecobank CI in its strategy of growth and development, transparency and proximity with its staff, customers and partners decided to sell 2,250,000 shares at a price of 20,000 FCFA on the BRVM market through a public tender offer. Thus, the first trading price will be determined by the confrontation of buy and sell orders with a reference price fixed at 20 000 FCFA.

□ **[BANK OF AFRICA]:** The banking group Bank Of Africa has published financial and stock market fact sheets of its main subsidiaries in West Africa. These fact sheets help to improve the visibility of investors on the performance of the various subsidiaries and increase transparency in the market.

□ **[SMB]:** Société Multinationale de Bitumes (SMB) has published its results for the third quarter of 2017. The company achieved a turnover down by 13% compared to the third quarter of 2016, weakened by the persistence of the slowdown in the local market and Nigeria, the company said. Nevertheless, SMB has achieved better profitability with a Gross Operating Surplus increasing by 66%. Net result amounted to 4.59 billion FCFA at the end of September 2017 against 3.75 billion FCFA at the end of September 2016.

### Market News

□ **[GUINEA]:** In a statement, the Guinean Government announced that it has secured approximately 21 billion USD in commitments from its technical and financial partners for the implementation of its 2016-2020 National Economic and Social Development Plan (PNDES). This fundraising, as part of its Advisory Group, goes well beyond the initial target of \$ 4.5 billion. Thus, the PNDES benefits from the unconditional support of the entire international community, through bilateral partners (including China and France with respectively 6 billion USD and 591 million USD) and multilateral partners (including the World Bank with 1.6 billion USD, the Islamic Development Bank and the Arab Coordination Group with 1.4 billion USD). Private investors, meanwhile, have announced more than 7 billion USD, including a significant part of Public Private Partnerships. The total budget of the PNDES is 14.6 billion USD over a period of 4 years. It is built around 4 pillars : good governance, inclusive growth, human capital and sustainable development.

□ **[MALI]:** According to a statement from the IMF, Mali's economic recovery continued in 2017 amid persistent security challenges. GDP growth is expected to remain robust, at 5.3%, supported by good harvests and strong public spending. Inflation would be moderate, at less than 1%. The overall fiscal deficit is expected to be 3.5% of GDP in 2017, compared to 3.9% of GDP in 2016, owing to improved revenue mobilization, and under execution of capital spending. The outlook remains generally positive with an estimated growth rate of 5% in 2018. However, the Malian economy continues to face increasing downside risks, particularly due to the security situation.
