Justification of the rating and outlooks
Long term:

High credit quality. Protection factors are good. However, risk factors are more variable and more significant in times of economic pressure.

Short term:

Very high certainty for timely repayment. Liquidity factors are excellent and are supported by good protection factors of key elements. Risk factors are minor.

Key performance factors
The rating is based on the following positive factors:

- A sector with great potential for growth;
- Good positioning in a highly competitive market
- strong support from the AWB group;
- Satisfactory corporate governance;
- Cost of risk controlled in general
- Improving results;
- Development of new activities to increase profitability;
- Good financing flexibility.

Main factors of fragility of credit quality:

- Decline in the average xxx of loans during the last five years;
- Coverage of appropriations by stable resources in decline since 2014;
- Social environment is relatively fragile.
